SPECIAL NOTICE

This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for calendar year 1989 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, including fibers, raw hides and skins, fats and oils, and beer and wine, which have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Service.

Trade statistics for selected nonagricultural products, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco are presented at the end of the commodity group tables.

Effective January 1, 1989, the United States joined other countries in adopting a new export and import commodity classification system based on the international Harmonized Commodity Description and Coding System (HS). The HS is intended to serve as a universal product nomenclature superseding the Customs Cooperation Council and the Brussels Tariff Nomenclatures previously used by many other countries. Many HS commodities are now reported in more detailed form than under the old Schedule B system, while others have been combined into broader groups. Data reported in the commodity group by country tables have been assigned to existing ERS commodity groups to the extent possible.

Exports

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service. More than 1,200 revisions have been incorporated into the 1988 and 1989 tables based on Census Bureau errata. The most significant data revisions included wheat, wheat flour, rice, barley, corn, grain sorghum, soybeans, soybean meal, and poultry meat.

Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from bonded Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.

Foreign Agricultural Trade of the United States, Calendar Year 1989:
Supplementary Tables. By Mary L. Fant, Commodity Economics Division, Economic
Research Service, U.S. Department of Agriculture. Staff Report No. AGES 9112.

Abstract

This report presents statistical summaries of U.S. foreign trade in agricultural products by country during calendar years 1988 and 1989. Exports and imports valued at more than \$1 million are shown. U.S. Bureau of the Census Schedule B and Tariff Schedule (TSUSA) listings are grouped in standardized economic classes or commodity groups. Effective January 1, 1989, the United States joined other countries in adopting a new export and import commodity classification system based on the international Harmonized Commodity Description (HS).

Keywords: Agricultural trade, agricultural exports, agricultural imports, trade statistics, farm product exports.

Acknowledgments

Traci C. Curry did the electronic word processing. Principal coordinator was Thomas A. Warden. Editorial support was provided by Bonita L. Moore, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

How to Subscribe to the Bimonthly Report

The periodical Foreign Agricultural Trade of the United States is published six times a year with two supplements. Subscription prices are \$25 a year domestic and \$31.25 foreign.
